## **Johnson Controls and StrionAir Form Strategic Alliance to Offer Air Purification System**

*Alliance to provide Johnson Controls customers with access to unique air purification system*

**MILWAUKEE & LOUISVILLE, CO. (28 April 2004)**— Johnson Controls, Inc. the global leader in facility management and control, has formed a strategic alliance with StrionAir, Inc. to offer StrionAir's high-performance air-purification system to Johnson Controls customers across its numerous vertical industries. StrionAir's patented technology enables facilities to reduce operating costs, protect building occupants from airborne threats and provide a more comfortable, productive work environment.

StrionAir's filtration system combines the best elements of ionization, electrostatics and mechanical filtration in a patented way that provides the only high-performance, low-resistance-to-airflow, germicidally active air purification solution that can be installed economically in virtually all commercial HVAC systems. Its germicidal effectiveness has been documented in laboratory studies against numerous airborne pathogens. The system is immediately available in North America.

"Johnson Controls is always seeking out innovative technologies like StrionAir's GC System to integrate into our vertical-industry solutions," said Don Albinger, vice president - Global Product Sales at Johnson Controls. "By leveraging the StrionAir system's performance, cost reduction, IAQ and security-related benefits within Johnson Controls' broad array of world-class facility solutions we are able to offer customers in diverse industries high-value solutions to their most pressing facility problems."

"We are proud to partner with an industry leader such as Johnson Controls who has the scope and scale to expedite the rollout of our breakthrough air purification technology," said Bruce Dawson, StrionAir President and CEO. "Together with Johnson Controls we will provide unrivaled solutions to today's most pressing air purification issues that effect building occupants, processes and equipment."

### **About Johnson Controls**

Johnson Controls, Inc., is a global market leader in automotive systems and facility management and control. In the automotive market, it is a major supplier of integrated seating and interior systems, and batteries. For non-residential facilities, Johnson Controls provides control systems and services including comfort, energy and security management. Johnson Controls (NYSE: JCI), founded in 1885, has headquarters in Milwaukee, Wisconsin. Its sales for 2003 totaled \$22.6 billion. For more information on Johnson Controls, Inc., visit the company's web site at [www.johnsoncontrols.com](http://www.johnsoncontrols.com).

### **About StrionAir**

StrionAir, Inc. is a Louisville, Colorado company that was founded in 1993 in response to a growing market demand for very high-performance, low-operating-cost air filtration systems. The company's patented technology represents the commercialization of groundbreaking research performed at Lawrence Livermore National Laboratory in the area of enhancing filter performance through electrical forces. StrionAir products are currently installed in healthcare, government and commercial facilities in North America.
